## Experiences

### Creative Developer

HETIC, Project Flixhive

April  
2023

For this project, I had the opportunity to manage the entire design and web integration aspect using Figma and React NextJS. To perform the web integration on NEXTjs, I had to use different npm modules such as shadcnui and TailwindCSS.

### Full-stack developer

Data2innov, Project Data2innov

December  
2023 - NOW

December 2023 - Present: Data2innov  
(alternance project)

- Developed an educational platform for data science using Next.js, React, Javascript and TypeScript.
- Styled the website with TailwindCSS for a modern and responsive design.
- Implemented a headless CMS (Strapi) for content management, allowing easy data retrieval and integration on the front end.
- Integrated Stripe for secure payment processing.
- Utilized Axios for handling HTTP requests.
- Designed the website layout and user interface using Figma.
- Created and managed various data science courses on the platform.
